E-Commerce Website

Website Hierarchy, Sitemap & Scope of Work

Single-Vendor Herbal Products Store

Prepared for client scope discussion

1. Disclaimer

This document represents the official proposed website hierarchy and scope of work shared by NexisLabs for **Herbedia** project. It serves as the primary reference for the website structure, features, functionality, dashboards, portals, and deliverables outlined herein.

2. Project Overview

The website is designed as a **single-vendor, direct-to-consumer (D2C) e-commerce platform**, where one business owns and manages the complete product catalogue, controls inventory, receives and processes customer orders, manages product information, and oversees the overall online shopping experience.

The proposed structure covers the complete customer journey, starting from discovering the brand and browsing the Herb Cabinet, through exploring categories and individual products, adding products to the cart, completing checkout and payment, and finally receiving and tracking an order. It also defines the administrative side of the platform, including product management, inventory management, order processing, customer management, website content, reporting, and other operational requirements necessary to run the online store effectively.

The structure below is based on a **standard D2C e-commerce model**, adapted specifically to the requirements and product experience of the herbal products business. It is intended to provide a clear understanding of the website's information architecture, major sections, user-facing functionality, required dashboards and portals, and the overall functional scope that will be developed as part of the project.

2. Website Hierarchy / Sitemap

High-level structure of the public website:

WEBSITE — Single-vendor herbal e-commerce website

- HOME
 - Brand Introduction
 - Frequency Healing
 - Herb Cabinet / Featured Products
 - Product Highlights
- HERBEDIA / ABOUT
 - About HERBEDIA
 - Heritage of Herbal Medicine
 - Frequency Healing
 - Value of the Product
- SHOP / HERB CABINET
 - All Herbs
 - Search
 - Filters & Sorting
 - Indication Categories
- PRODUCT DETAILS
 - Product Name
 - Product Composition
 - Chemistry & Physiological Effects
 - Directions for Use
 - Dosage / Frequency
 - Storage Instructions
 - Cautions / Notices
 - Quantity & Price
 - Availability
 - Add to Basket
- **CART** — Review selected products
- **CHECKOUT** — Customer + delivery + payment
 - Customer Details
 - Delivery Address
 - Shipping Method
 - Order Summary
 - Coupon / Discount
 - Payment
- **ORDER CONFIRMATION** — Successful order summary
- **CUSTOMER ACCOUNT / PORTAL** — Registered customer area

- **SUPPORT** — Customer support information
 - **FAQ**
 - Contact
 - Shipping & Returns
- **LEGAL**
 - **Legal Notice**
 - **Privacy Policy**
 - **Terms & Conditions**
 - Return Policy

4. Standard E-Commerce Scope of Work

4.1 Homepage

- Responsive header with logo, navigation, search, account and cart.
- Hero / brand introduction section.
- Frequency Healing
- Featured herbs / products.
- Herb Cabinet
- Product Highlights
- Footer with support, policies and contact information.

4.2 Shop & Product Catalogue

- Single-vendor product catalogue.
- All-products / Herb Cabinet page.
- Search functionality.
- Filtering and sorting.
- Product cards with image, name, price, availability and relevant metadata.
- Pagination or equivalent catalogue loading.
- SEO-friendly product and category URLs.

4.3 Product Details

- Product name
- Product Composition
- Chemical & Psychological effects
- Directions for Use
- Net quantity and price.
- Storage Instructions
- Dosage / frequency information where supplied by the business.
- Cautions / notices / health disclaimer where applicable.
- Availability / stock status.
- Add-to-basket / quantity controls.
- Related or recommended products where applicable.

4.4 Cart & Checkout

- Add, remove and update cart items.
- Quantity management.
- Cart subtotal and total.
- Coupon / promotional code support if required.
- Shipping charge calculation.
- Customer details.
- Delivery address.
- Shipping method.
- Payment gateway integration.
- Order summary.
- Order confirmation after successful purchase.

4.5 Customer Portal

- Customer registration and login.
- Customer dashboard.
- Profile management.
- Saved delivery addresses.
- Order history.
- Order details.
- Order status / tracking information.
- Wishlist.
- Password reset and account security.

4.6 Admin Dashboard

- Secure administrator login.
- Dashboard overview.
- Product management.
- Category / indication management.
- Inventory / stock management.
- Order management.
- Customer management.
- Coupon / discount management.
- Payment / transaction visibility.
- Reports and basic business summaries.
- Admin users / permissions.
- General website settings.

4.7 Order Management

- View all orders.
- Search and filter orders.
- View customer and order details.
- Payment status.
- Order processing status.
- Packing / dispatch status — updated manually by the admin or automatically through a logistics / shipping API integration.
- Shipping / tracking details — updated manually by the admin or automatically through a third-party logistics / shipping API integration.
- Delivered / cancelled / returned status.
- Invoice / order document generation where required.

4.8 Inventory Management

- Product stock quantity.
- SKU / product-level stock.
- Low-stock indicators.
- Out-of-stock handling.
- Inventory adjustment.
- Stock visibility from the admin dashboard.

4.9 Content & Support

- About / The House.
- Heritage / brand story.
- How the House Works.
- Harvest Calendar.
- FAQ.
- Contact.
- Shipping & Returns.
- Legal Notice.
- Privacy Policy.
- Terms & Conditions.
- Return Policy.

4.10 Notifications

- Order confirmation email.
- Payment success / failure notification.
- Order status notifications.
- Shipping / delivery notification where supported.
- Admin order alerts.

4.11 Responsive, SEO & Security

- Responsive website for desktop, tablet and mobile.
- SEO-friendly page structure.
- Meta title and description management.
- Sitemap support.

- Optimised images and frontend performance.
- HTTPS / SSL.
- Secure customer authentication.
- Secure admin authentication.
- Input validation and standard application security practices.

5. Required Dashboards & Portals

For this single-vendor business model, two primary portals are required:

Portal	User	Purpose	Core Modules
Customer Portal	End customer	Manage account and purchases	Dashboard; Profile; Addresses; Orders; Order Details; Tracking; Wishlist; Password
Admin Portal	Business / Admin team	Operate the complete online store	Dashboard; Products; Categories; Inventory; Orders; Customers; Coupons; Content; Reviews; Reports; Settings

Not required for this project: Vendor portal, marketplace dashboard, vendor commissions, vendor onboarding or multi-vendor management. This is a single-vendor e-commerce website.

6. Admin Dashboard — Detailed Structure

Dashboard

- Sales overview
- Orders summary
- Revenue summary
- Customers summary
- Low-stock / out-of-stock alerts
- Recent orders

Products

- Add product
- Edit product
- Delete / archive product
- Product images
- Pricing
- SKU
- Stock
- Preparation / product metadata

Categories

- Create / edit indication categories
- Assign products to categories
- Category content

Inventory

- Stock levels
- Stock adjustment
- Low-stock threshold
- Out-of-stock visibility

Orders

- New
- Processing
- Shipped
- Delivered
- Cancelled / returned
- Order details
- Payment status
- Tracking

Customers

- Customer list
- Customer profile
- Order history
- Addresses
- Account status

Marketing

- Coupons
- Discounts
- Featured products

Content / CMS

- Homepage sections
- About / House pages
- FAQ
- Harvest Calendar content
- Policies
- Contact information

Reviews

- View reviews
- Approve / reject
- Moderation

Reports

- Orders
- Sales
- Products
- Inventory
- Customers

Settings

- Payment
- Shipping
- Tax if applicable
- Notifications
- Admin users / permissions
- General website settings

7. Scope Assumptions

- The business operates as a single seller / single catalogue owner.
- Product data, images, descriptions, prices, preparation instructions and legal content are provided or approved by the client.
- Payment gateway will be selected and credentials will be provided by the client.
- Shipping / logistics tracking can be handled either by manual admin status updates or by integrating the relevant third-party logistics / shipping API.
- Tax and regulatory content will be supplied or approved by the client.
- Any third-party subscription, gateway, SMS, WhatsApp, email or courier charges are separate from development charges unless explicitly included in the commercial proposal.
- Final number of products and categories can be populated according to the agreed catalogue size.
- Any functionality outside this document will be treated as additional scope and evaluated separately.

8. Scope Summary

Area	Standard Scope	Status
Public Website	Responsive single-vendor storefront	Included
Product Catalogue	Categories, search, filters, product pages	Included
Cart & Checkout	Cart, address, shipping, payment, confirmation	Included
Customer Portal	Account, orders, addresses, wishlist	Included
Admin Portal	Products, inventory, orders, customers, content, reports	Included
Payment Gateway	Integration with selected gateway	Included*
Shipping Integration	Manual admin status updates or third-party logistics / shipping API	To Confirm

* Payment gateway integration assumes the client provides the required merchant account / credentials and that the selected gateway supports the required transaction flow.

9. Final Website Map — One-Page Reference

PUBLIC WEBSITE	SHOPPING	CUSTOMER
Home Shop / Herb Cabinet Product Details Support Legal	Cart Checkout Payment Order Confirmation	Login / Register Dashboard Profile Addresses Orders Tracking Wishlist
ADMIN PORTAL	CATALOGUE & OPERATIONS	CONTENT & BUSINESS
Dashboard Products Categories Inventory Orders Customers	Stock Order Processing Payments Shipping Coupons Reviews	Homepage House / About FAQ Policies Reports Settings
CORE FLOW	Home → Shop → Product → Cart → Checkout → Payment → Confirmation	Customer Portal + Admin Portal
